News Release

WEST WOOD INTERCEPTS and FAVORABLE HORIZONS at SLEEPER

X-Cal Resources is pleased to announce drill intercepts from the West Wood Area, Sleeper Gold Project, Humboldt County, Nevada:

The above new West Wood drill intercepts are part of definition-drilling programs which are taking place at Sleeper to quantify mineralization in NI-43-101 terms.

The 2007 X-CAL Annual Report contains assay highlights from previous West Wood Area drilling and explains how a current geologic breakthrough has pointed to favorable strata/horizons that should be drilled in the Sleeper Mine Site Area.

The following chart shows assay highlights from previous drilling in the West Wood Area.

HOLE	FROM feet	TO feet	LENGTH feet	Au opt	FROM meters	TO meters	LENGTH meters	Au gpT

The importance of the above West Wood assays and their relevance to ongoing exploration of favorable strata/horizons at Sleeper is explained with text and graphics in the current X-CAL Annual Report.

The elevation where West Wood occurs is prospective along the entire west side of the Sleeper pit.

Drill core from initial holes into the NW Target, located 1500 meters north of West Wood, has anomalous gold values and is similar in appearance to West Wood. The new Annual Report contains a color photograph of the encouraging NW Target drill core (silicified-sulphide-breccia). The report also contains a long-section, which shows the prospective horizon between West Wood & the NW Target.

Ongoing definition drilling at Sleeper is aimed at three areas: the “Facilities Area”, “West Wood” and above-ground mineralization in the “Heap Leach Pads”.

Readers are encouraged to view the new 2007 X-CAL Annual Report online for graphics and project overview, as well as the NI-43-101 Technical Report on the Sleeper Gold Project, at www.x-cal.com or on SEDAR.

The contents of this release have been reviewed by Robert Thomason, M.Sc., who is a “Qualified Person” as defined by NI-43-101.

President

Caution Concerning Forward-Looking Statements

This release and related documents may contain certain “forward-looking statements” including, but not limited to, statements relating to interpretation of drilling results and potential mineralization, future exploration work at the Sleeper Gold Project, the Mill Creek Gold Project, the Reese River Project and the Spring Valley Area Project and the expected results of this work. Forward looking statements are statements that are not historical facts and are subject to a variety of risks and uncertainties which could cause actual events or results to differ materially from those reflected in the forward-looking statements, including, without limitation: risks related to fluctuations in gold prices; uncertainties related to raising sufficient financing to fund the planned work in a timely manner and on acceptable terms; changes in planned work resulting from weather, logistical, technical or other factors; the possibility that results of work will not fulfill expectations and realize the perceived potential of the Sleeper Gold Project, the Mill Creek Gold Project, the Reese River Project and the Spring Valley Area Project; uncertainties involved in the interpretation of drilling results and other tests; the possibility that required permits may not be obtained in a timely manner or at all; risk of accidents, equipment breakdowns or other unanticipated difficulties or interruptions; the possibility of cost overruns or unanticipated expenses in the work program; the risk of environmental contamination or damage resulting from the exploration operations at the Sleeper Gold Project, the Mill Creek Gold Project, the Reese River Project and the Spring Valley Area Project.

Forward-looking statements contained in this release and related documents are based on the beliefs, estimates and opinions of management on the date the statements are made. There can be no assurance that such statements will prove accurate. Actual results may differ materially from those anticipated or projected. X-Cal Resources Ltd. and X-Cal USA, Inc. undertake no obligation to update these forward-looking statements if management's beliefs, estimates or opinions, or other factors, should change.
